Job offer: Senior Front-end engineer (f/m/d)

Berlin

Fulltime

Hybrid (office & remote)

Open now

About us

.img – itai's machine GmbH is the digital unit of the „Berliner Verlag“ publishing group. With our „journalistic operating system“ (.jOS) we provide a cloud-native publishing platform that serves millions of users by connecting to headless CMSs, processing and enriching content, and distributing it via web and apps. This helps regional newspapers to meet the challenges of the digital age: it facilitates reach, engagement, and monetization of journalistic content and integrates it with analytics and AI services. In addition to the publications of „Berliner Verlag“, we work with other national and regional media companies.

Your role

Take responsibility for the growth of the .jOS platform. As a senior engineer you can contribute to the following areas:

- Usage of current front-end technologies (e.g., next.js, react, TypeScript) and adaptation of related architectures (e.g., PWA, SSR, state management)
- Writing and improving unit and integration tests
- Optimization of user experience and frontend performance (e.g., Core Web Vitals) while managing integrations with third-party services (e.g., analytics, consent, ads)
- DevOps processes with a high degree of automation and focus on quality (e.g., AWS managed services, trunk-based development, merge requests, CI/CD pipelines)
- Optionally, working with mobile technologies (e.g., react native) to wrap web experiences for native platforms

Your background

- 5+ years of experience in software engineering with a focus on front-end technologies, ideally on top of a degree in computer science or a related field (e.g., mathematics, physics)
- In depth understanding of scaled frontends (including vanilla JavaScript and node.js in browsers) and ability to work with a complex custom codebase; ideally with previous experience in performance / engagement
- Passion to understand business goals and user experiences behind software systems
- Collaborative approach to shared development with an ability to vocalize feedback and contributions to guide colleagues, and communicating with stakeholders
- Good knowledge of English; a working understanding of German is a plus

Our environment

- Contribute to our journey of building the best digital publishing platform in a permanent full-time position, available immediately (or as it fits your planning)
- Modern office with a view in the centre of Berlin (Alexanderplatz) with all the usual amenities (e.g., laptop of your choice, free coffee and drinks, weekly team events, garage for bicycles)
- Contemporary company culture with a high degree of autonomy and trust, close collaboration within the team, and continuous professional development

What's next?

Please send your application documents, a possible start date, and your expected salary to hr@dotimg.com – we're happy to address any potential questions and inquiries there as well. If all goes well, you'll hear from us within the next few days to schedule an interview.
